

Smart devices

Skills	Grade	Evaluation method
<u>Introduction to Sensors</u>		
Understand basic notions of sensors, data acquisition: physics, electronics and metrology point of view	2	Exercise of application by project group to be inserted in the portfolio
Be able to manufacture a nano-particles sensor using micro-electronics tools: chemical synthesis, assembly,	1	Cleanroom training
Be able to design the datasheet of the sensor manufactured	2	Datasheet inserted in portfolio
<u>Microcontrollers and Open Source Hardware</u>		
Understand microcontroller architecture and how to use them	3	Portfolio
Be able to design data acquisition system (sensor, conditioner, microcontroller) with respect to the application	2	Portfolio
Be able to design the electronic circuit of a sensor's signal conditioner (design + simulation)	2	Portfolio
Be able to design a shield to accommodate the gas sensor	2	Portfolio
Be able to design the software to use the gas sensor and its HMI	2	Portfolio
Be able to combine all of the above mentioned components into a smart device	2	Portfolio

1-level of application: follow-up of instructions or procedures

2-level analysis: improvement or optimization of solutions or proposals

3-level of control: design of programs or definitions of specifications

4-level of expertise: definition of guidelines or strategies
